PROFESSIONAL SUMMARY

Results-driven Software Engineer with 3+ years of experience building scalable enterprise applications using **Java**, **C++**, **Spring Boot**, and **ReactJS**. Experienced in **distributed systems**, **microservices architecture**, **performance optimization**, and **debugging complex production issues**. Proven ability to design reliable backend services and deliver high-impact features in large-scale enterprise environments.

EXPERIENCE

- Software Engineer** Oct 2025 – Present
Arctera India Pvt. Limited (Previously known as Veritas) Pune, Maharashtra
 - Developing and enhancing the **Data Insight** platform focused on large-scale **data governance, compliance, and analytics** across enterprise storage systems.
 - Designed and implemented a **Telemetry service** to collect operational insights from customer environments, enabling data-driven product improvements and better business decision making.
 - Optimized API performance by introducing **Guava-based caching**, reducing redundant database calls and improving response time from **60 seconds to 1–2 seconds** for large data.
 - Debugged and resolved complex **production issues** related to file classification, audit pipelines, and workflow processing, improving system stability and reducing recurring failures.
 - Built a **Python-based utility** to simulate **CPU and memory spikes**, enabling QE teams to reliably reproduce customer issues in-house and accelerate root cause analysis.
- Associate Software Engineer** July 2023 – Sept 2025
Siemens Digital Industries Software Pune, Maharashtra
 - Designed and implemented new UI features for **Teamcenter** using **ReactJS**, significantly enhancing **user experience** and **responsiveness** for enterprise users.
 - Developed robust, modular backend **APIs** in **C++** following a **Service-Oriented Architecture (SOA)** model to ensure **scalable, maintainable, and loosely coupled** server-client communication.
 - Optimized a critical **backend APIs**, reducing execution time from 85s to 2.43s (**97% improvement**), enabling seamless processing of high-volume enterprise customer data.
 - Worked in **Agile sprints** to deliver features with **95%+ unit test coverage** using **Jest, JUnit, and xUnit**, and performed end-to-end UI testing with **Playwright (JavaScript)** to ensure reliable user workflows. Collaborated closely with **QA** and **cross-functional teams** to ensure high-quality releases.
 - Resolved important **defects**, improving customer satisfaction and software stability. Also, gained strong debugging experience across various technical stacks.
- Software Engineer Intern** July 2022 – June 2023
Siemens Digital Industries Software Pune, Maharashtra
 - Contributed to a **large-scale enterprise web application**, implementing new business logic and user workflows across **frontend and backend**.
 - Developed server-side logic using **Java and C++** to support dynamic data rendering.
 - Collaborated with cross-functional teams to review **design specs**, write **unit tests**, and debug complex issues.

PROJECT

- TaskMe** [Github](#)
Full-stack task management application with role-based access, task tracking, and analytics dashboard built using Spring Boot and PostgreSQL.
TechStack: React, Tailwind CSS, Java, Spring Boot, PostgreSQL

SKILLS

- Languages:** Java, C++, Python, JavaScript, SQL
- Frameworks/Technologies:** Spring Boot, Hibernate, ReactJS, REST APIs, CI/CD, Git, Bitbucket, Jenkins, Docker
- Database:** SQLite, Oracle, PostgreSQL, MongoDB
- Tools:** Postman, Jira, JUnit, Maven, VSCode, Eclipse, Sonarqube, Artifactory, Github, Bitbucket, TortoiseGit

EDUCATION

- Vishwakarma Institute of Technology** Pune, India
Bachelor of Technology in Computer Engineering; CGPA: 8.96 Aug. 2019 – 2023

ACHIEVEMENTS

- STAR Performance Award** : Awarded for outstanding contributions to Teamcenter 2506 product Development.
- Finalist, IBM Z Datathon (Top 1% among 1600+ participants)
- AWS Cloud Technical Essentials Certified**
